The Second Day Of ELMUN

The first day of ELMUN has passed, and we all gave our best to make it as great as possible. We worked hard but also had a lot of fun. Let's have a quick recap of the first day. Firstly, all the delegates and the general secretariat assembled in the assembly hall to let the ambassadors of each country present their opening speeches. For the first time in ages, the president of the general assembly didn't have to intervene because someone was overusing the one-minute time limit. After the chairs collected their delegates, they went on to the next stop to start forming their resolutions. But it wouldn't be ELMUN if that were all that happened. In the course of the day, we experienced a broken escalator, and for some of the participants, they finally met Mr. Greifeld's son for the first time. Wasn't he adorable?

That's it for now, but I'm excited to find out what will follow!

Secret behind the success

How courageous must you be to become the "only one"? How much effort has to be invested to be in this position? As an 11th-grade student from the IB profile and as our new deputy secretary general, Idrisa Aicha Liere invested incredibly much effort into this event. Having experienced THIMUN herself, Idrisa is keen to use the experience she has gained from the large-scale MUN to organize this year's ELMUN better and trying to present the best result and a well organized MUN for the delegates. Attaining the position of deputy secretary-general in ELMUN is a prestigious achievement reserved for individuals like Idrisa Aicha Liere, who demonstrated exemplary leadership and a deep understanding of global issues. Lastly, our dear deputy secretary-general left a few words for the future deputies: "It is essential to start early with the preparation and ensure the motivation of the delegates."

Artin Majidi

Proceeding our esteemed president of the general assembly will be the new deputy President Artin Majidi from 11th grade IB profile. He shows advanced ability to build consensus and manage diverse perspectives. Obstacles are unavoidable Artin Majidi has met several difficulties while preparing ELMUN, he shared his experience claiming that there was a lot of undiplomatic answers. But these obstacles did not stop Artin from progressing ELMUN. As a small reminder from the deputy president: "Don't take it too serious please. It's still a simulation, so there's no need to correct people every time for clapping and stuff like this. So don't stress out."
